EDUCATION

Government College of Engineering and Research, Avasari Khurd

Bachelor of Engineering in Computer Engineering | CGPA: 7.49/10

Nov 2022 – May 2026

Pune, Maharashtra

New Arts, Commerce and Science Jr. College

Higher Secondary Certificate (HSC) – Science | 63.00%

Completed Jun 2022

Ahilyanagar, Maharashtra

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, C++, HTML/CSS

Frontend: React.js, Next.js, Tailwind CSS, Zustand

Backend: Node.js, Express.js, FastAPI, REST APIs, JWT Authentication

Databases: MongoDB, MySQL, PostgreSQL, Supabase, ChromaDB

AI & LLM: Gemini API Integration, Prompt Engineering, AI Application Development

Tools & Platforms: Git, GitHub, Docker, Redis, Postman, VS Code, Vercel, Render, Cloudinary

EXPERIENCE

Cognifyz Technologies

Web Development Intern (Remote)

Jan 2025 – Feb 2025

- Developed responsive web interfaces using **HTML, CSS, and JavaScript**, improving UI consistency and usability across multiple pages.
- Implemented reusable frontend components and optimized layouts for better responsiveness across devices.
- Collaborated using **Git/GitHub workflows** for version control and efficient project delivery.

COMPSA, GCOEARA

Social Media Handler & Technical Team Member

Sep 2023 – Present

Pune, Maharashtra

- Contributed to the development and maintenance of the **official COMPSA website** for the Computer Engineering department.
- Managed social media promotions and technical event outreach, improving student engagement and participation.
- Coordinated technical seminars, competitions, and department-level activities for students.

PROJECTS

DevPilot AI – AI-Powered Code Intelligence Platform | Next.js, FastAPI, Redis, Supabase, Gemini

- Developed a full-stack developer platform that imports GitHub repositories and enables AI-powered codebase exploration through natural language queries.
- Built a decoupled architecture using Next.js and FastAPI, integrating Supabase authentication, repository management, and backend APIs.
- Implemented asynchronous repository processing using Redis Queue (RQ), improving responsiveness during repository indexing and analysis.
- Integrated Google Gemini APIs to enhance code understanding, query expansion, and automated code review workflows.
- Designed and deployed the application using modern cloud-based development tools and scalable deployment workflows.

FoundrKit – AI-Powered Virtual Co-Founder (SaaS) | Next.js, TypeScript, FastAPI, Supabase

- Built an AI-powered SaaS platform that automates startup workflows including proposal generation, branding assistance, market research, and content creation.
- Developed a scalable full-stack architecture using Next.js, TypeScript, FastAPI, and Supabase for authentication and data management.
- Integrated Google Gemini APIs and AI image generation services to deliver intelligent startup assistance features.
- Implemented secure authentication and cloud deployment using Supabase, Vercel, and Render.

Smart Wallet – Full-Stack Financial Manager | MongoDB, Express.js, React.js, Node.js

- Developed a MERN-stack financial management platform for expense tracking, budgeting, and financial analytics.
- Implemented JWT authentication and role-based access control, ensuring secure multi-user access.
- Designed RESTful APIs and MongoDB data models supporting transaction management and reporting.

ACHIEVEMENTS & CERTIFICATIONS

- Best Paper Award – ICRAE 2026:** Research paper titled “FoundrKit: An AI-Powered Virtual Co-Founder” recognized at Wadia College of Engineering, Pune.
- Finalist – i2i Hackathon 2024:** Advanced through all competition phases and received prototype funding support.
- Certifications:** Deloitte Technology Virtual Experience Program (Forage), Introduction to Prompt Engineering for Generative AI, Web Development Internship Certificate – Cognifyz Technologies.
